

Air blowing or suction gun VOSP-03 – „Wonder gun“

- Air blowing or suction gun
- Transfer of solid material (shavings, sawdust, fine dust, dirt, ...)
- Liquid pumping
- Cleaning the surface of machines and equipment

- Simply switching the function from suction to suction
- Low consumption of compressed air
- Lightweight, mobile and rugged devices
- No moving parts
- Strong blow/suction current

VOSP-03 is an efficient and cost-effective solution for a wide range of housekeeping and industrial cleaning applications. It's a blow and suction gun, a collection and transmission system in one simple package.

Easy to switch from blow function to suction function by turning the main valve.

It use the principle of the transvector - draws a large amount of ambient air - economical function of the volume gain of the main current.

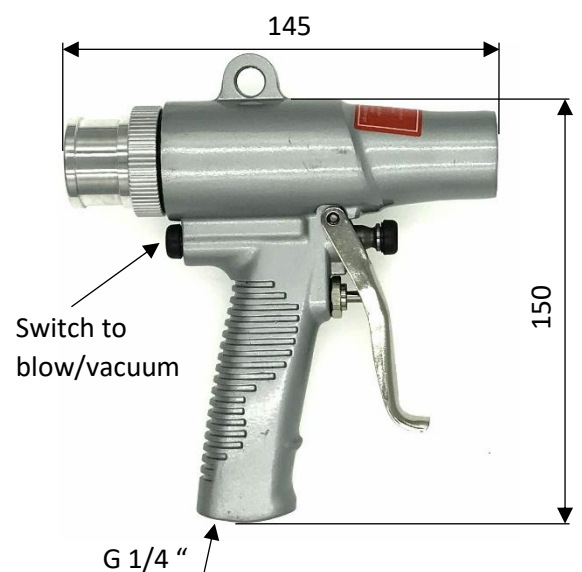

Large selection of accessories for a variety of applications.

Technical specification:

Medium	compressed air
Working pressure	2 to 6 bar
Consumption air (5,5 bar)	500 NI/min
Weight	400 g
Pneumatic connection	G 1/4 "
Material	aluminium alloy

Industrial applications:

- Cleaning of surfaces, machines and equipment
- Blowing impurities from the industrial parts
- Pumping liquids
- Transportation of hard and loose materials (sawdust, shavings, chips, dirt, dust, ...)
- and many others...

Included accessories:

- 1) Gun VOSP
- 2) Wide circular nozzle
- 3) Nozzle with brush
- 4) Narrow circular nozzle
- 5) Flexible hose
- 6) Flat nozzle
- 7) Dust bag
- 8) Clasp (2x)
- 9) Hose
